

## BIG DEALS ARE GOING THROUGH

The men of money are coming to Rawhide. This week two big deals went through. The control of the Rawhide Queens Mines Company, on which estate is the famous Kearns No. 2 lease, was optioned by New York and Philadelphia capital, at a valuation of one million dollars for the entire mine. The first payment on the two Mascot claims was made in Reno, the deal on that property having been put through last week.

A million dollars for a mine which five months ago had nothing further than some rich surface showings to boast of, is a pretty fine thing in any camp, and the best possible advertisement of the resources of the camp. The showing on the Kearns No. 2 did the work, and the Eastern experts who were sent here to inspect those showings were unanimous in their praise of the ground.

In the past two weeks there have been a dozen experts on the ground, and the men of the London Venture Company want to get in here, either in the Rawhide Consolidated Mines Company or the Coalition. Two experts from the house of Rothschild are on their way hither from Europe.

A mill of 40 tons daily capacity was shipped today from the Union Iron Works in San Francisco; the Murray lease people will begin the construction of a ten-stamp mill within 20 days. H. W. Throckmorton, who has been here from New York for six weeks, has advised his principals to commence the construction of a 200-ton mill on the flat right away. Anderson, of the Water Works, will soon begin the construction of a 200-ton mill, and A. A. Codd has already started in upon the construction of a ten-stamp mill; and the little Gates mill down in the flat has more work than it can take care of, and the owners are enlarging their plant.

Options on several properties are held by outsiders, and two more deals have been practically closed by Mr. Throckmorton. The banking situation is in a fair way of being settled, and a national bank will be installed here. The plant of the Rawhide Water and Reduction Company will begin arriving here this afternoon. In the opinion of the men who have given the greatest study to the conditions of the camp, bedrock has been touched and Rawhide is on the rebound. In the meantime development produces more gold, and strikes are as frequent as ever, only that they are being made at greater depth. The outlook for Rawhide is as good, if not better, than that of any camp in the world today.—Rawhide News.

## GATES STARTLES HIS HOME TOWN

ST. CHARLES, ILL., June 30.—John W. Gates visited his mother here yesterday, and the town will be gasping over what he did for six months. Politics, the county fair, the price of oats, everything pales into mere gossip alongside of Gates. Epitomized, here is what he did during his five hours' visit:

Arose early, got shaved and gave the barber a \$10 gold piece.

Threw a shower of half dollars for street urchins to scramble for.

Bought a fine stock farm for \$25,000 and presented it to an old friend who had always wanted it.

Bought a five-cent cigar and smoked it blissfully.

Picked up a boy and will take him through Europe on an automobile tour.

Kissed his aged mother good-bye and with his wife and boy started East.

Gates and his wife came here to make a brief visit with his mother, Mrs. A. A. Gates, before they started on a long tour of Europe.

### ST. MARK'S GUILD.

The regular meeting of St. Mark's Guild has been postponed until Friday, July 10th.

### SURE TO COME BACK.

"Do you really keep a cat?"

"Yes, and I can tell you the best way to do it."

"How?"

"Try to chase it away."—Exchange.

## ELKO GROUP SOLD BY SNYDER

Last week Willard F. Snyder, of Salt Lake, went to New York and as a result of that trip it is announced that the property of the Elko Prince has been transferred to New York capitalists, says the Elko Free Press. Mr. Snyder is the president of the company, owning the Baltimore group at Lone Mountain, sometimes known as the Weston Mine.

The Elko group comprises 100 acres of Elko Mountain. The Midas is on one side and the Gold Crown on the other.

Primarily the property was located by Paul Ehlers, the "Lucky Dutchman," who, by a series of crosscuts, exposed the gold-bearing leads, numerous of which cross the group. These leads are good sized, the main one on which most work is being prosecuted is from 12 to 16 feet wide on outcrop, and where depth has been attained is widening as it goes down. In the 60-foot shaft, with a gratifying regularity, is a two-foot liner that assays from \$63 to \$250 per ton. The balance of the lead assays \$15. With ultimate tunnel openings and the Elko Prince has famous tunnel advantages, there is every condition favorable for mining and milling on a cheap basis. The property is being worked by leasers and on company account, and wherever this diligence is applied the response is of such a kind as to place the Elko Prince in line with the great gold mines of the West.
